

LSM: CANVAS

YEAR: 2023

## ATHENA'S OBJECTIVES

Athena Labs partnered with us to create a transformative executive training course on delegation for global executive assistants. Their goal: move beyond standard corporate modules and deliver a learning experience that builds real-world skills, fosters trust, and supports workplace collaboration.

## OUR APPROACH

We designed a dynamic, AI-enhanced course with real-world scenarios, interactive elements, and rich media. The program included custom video scripts, immersive case studies, and an activity workbook to ensure learners could apply skills immediately. We also managed a seamless migration from Articulate Rise to Canvas LMS within tight timelines and budget.

## OUTCOMES

- Learners praised the clarity, structure, and relevance of the course.
- Practical tools, like the delegation action plan, enabled immediate application in the workplace.
- Future iterations will include gamification and expanded content based on learner demand.

**Course:**  
*Mastering Delegation*
